

Natuva Sree Naga Dakshayani

Electric Mobility & Automobile Engineering Enthusiast | B.Tech EEE | Java Developer

 natuvadakshayani@gmail.com

 6301709414

 Kurnool, Andhra Pradesh

 LinkedIn

Professional Profile

Motivated **BTech Electrical and Electronics Engineering (EEE)** student with strong interest in **Electric Vehicles, Automobile Technology, and Software Development**. Skilled in **Java programming, problem solving, and basic knowledge of EV systems and battery technologies**. Passionate about applying engineering and programming skills to develop **innovative electric mobility and intelligent automotive solutions**. Seeking opportunities to contribute to the **EV, automobile, or software industry** while continuously learning and improving technical expertise.

Education

09/2023 – 05/2026 Kurnool, AP	BTech - Ashoka Womens Engineering College Electrical & Electronic Engineering CGPA:8.90
09/2021 – 03/2023 Nandyal,AP	Intermediate - Narayana Jr College Board of Intermediate Education Percentage: 88
06/2020 – 05/2021 Nandyal,AP	SSC - Good Shepherd English Medium School Board: SSC Percentage: 87

Skills

Electrical & EV Technologies • Electric Vehicle Technology • Power Electronics • Embedded Systems • Power System Analysis • Control Systems	Tools / Software • MATLAB / Simulink • AutoCAD Electrical
Programming Skills • Java • Python	Soft Skills • Teamwork & Collaboration • Communication Skills • Time Management • Adaptability

Projects

- Automatic Water Tank Level Controller**
 - Developed an automated system to **turn OFF the motor when the tank is full** using water level sensors and relay control.
 - Improved **water conservation and energy efficiency** through automatic pump control.
- AI & ML Applications in Power Systems**
 - Explored the use of **machine learning techniques for load prediction, fault detection, and smart grid optimization**.
 - Studied integration of **AI-based decision systems** to enhance power system reliability and efficiency.
- Transformer Working Model**
 - Developed a model to demonstrate **step-up and step-down voltage transformation using electromagnetic induction**.
 - Showcased practical understanding of **transformer operation in power transmission systems**.
- IoT-Weather Reporting System**
 - Developed an **embedded system-based IoT project** to monitor and report environmental conditions using sensors and microcontroller.

Internships

02/2026 – 06/2026 Hyderabad	Electrical Vehicles (Ongoing) <i>Intern -Electric Vehicle , Pursuit Future Technology, Hyderabad</i> • Learning basics of EV systems, battery technology, and electric mobility and completed hands-on EV projects.
08/2025 – 09/2025 Hyderabad	Embedded Systems  <i>Intern – Emerging Technologies, Pursuit Future Technology ,Hyderabad</i> • Learned basics of embedded systems and automation and completed hands-on projects during the internship.

Awards

First Prize – Electric Vehicle Technologies Event

SRIT, Proddutur

- Secured **1st Prize** for presenting on **Latest Technologies in Electric Vehicles** at **SRIT College**.

Captain – Green Energy & Sustainability Club

Cult Club , Ashoka Womens Engineering College, Kurnool

- Led sustainability initiatives and organized activities related to **renewable energy and electric mobility**.

Certificates

Workshop on 5G & Robotics

IIIT DM , Kurnool

Getting Started with AI

IBM

English Language for Competitive Exams
